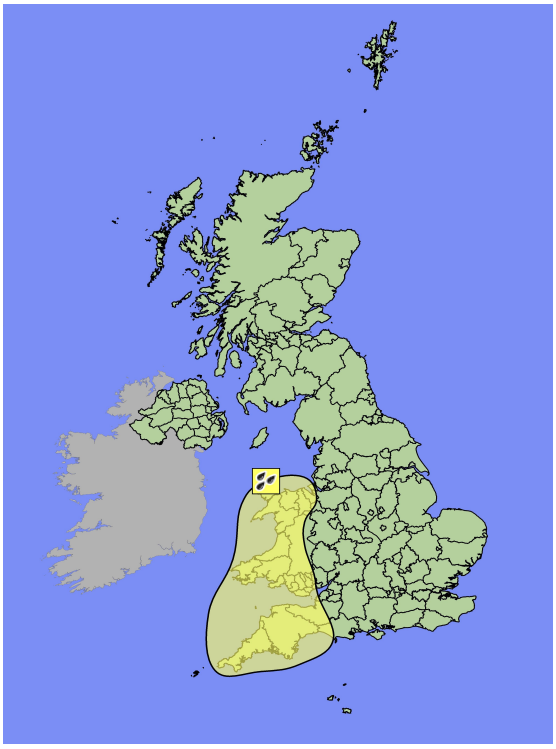
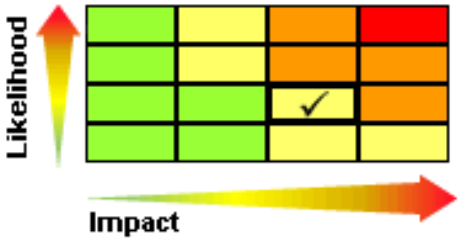
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure and associated frontal system, are expected to bring periods of heavy rain and showers to parts of Southwest England and Wales during Monday. The location and intensity of the heaviest rain is uncertain, although parts of North Wales are considered most likely to experience the heaviest rain. A drier interlude may develop across parts of southwest England and east Wales for a time, before heavy showers break out in the afternoon. Accumulations of around 10-20 mm are possible and locally 30 mm, especially North Wales.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:05 on Mon, 26th Nov 2012** until **21:00 on Mon, 26th Nov 2012**

Heavy rain is expected to affect parts of Wales and southwest England during Monday. Given the saturated nature of ground, the public should be aware of the possibility of further flooding and disruption to travel.
